

# Hello I am AJ Presas

Las Vegas, NV | (614)-915-2674 | a.presas@outlook.com

## Summary

Resourceful, organized, and personable recent Computer Science Graduate, eager to break into the industry full-time and help contribute to your organization, culture, and success. In my previous profession, my passion and proficiency with technology led me into many IT based responsibilities in addition to my official duty as a Pharmacy Technician. I feel confident that these roles and experiences, coupled with my education have equipped me well to handle any challenges thrown at me. I am passionate about programming and have worked on and with computers my whole life. I am military trained with the discipline and motivation to find effective and efficient solutions to any problem. A ball of clay ready for molding and an eager quick study. I am also experienced in management roles and scheduling.

## Education

JUNE 2019 - JULY 2022

### **Western Governors University** – *Bachelors of Science: Software Development*

- Introduction to IT
- Web Development Foundations
- Web Development Applications
- Data Management Foundations
- Data Management Applications
- User Interface Design
- User Experience Design
- User Interface Design
- Technical Communications
- Business of IT- Project Management
- Business of IT Applications
- Scripting and Programming Foundations
- Scripting and Programming Applications
- Network and Security Foundations
- Software I
- Software II- Advanced Java Concepts
- IT Foundations
- IT Applications
- Data Structure and Algorithms
- Software Engineering
- Software Quality Assurance
- Mobile Application Development
- Operating Systems for Programmers

## Experience

MARCH 2011 - MARCH 2017

### **United States Air Force** – *Pharmacy Technician*

- Managed and oversaw the Pharmacy at Nellis Air Force Base to include 35 employees, 28.5M in medication inventory and 2.5M of automation equipment and technology. I fulfilled a multidisciplinary role that required me to repair and maintain automation and robotics equipment as well as all other supporting technologies. My favorite project was leading the reinstallation of automated pharmacy equipment in the OB clinic during

renovations in 2012. We handled \$83,000 worth of equipment and relocated it frequently to accommodate the renovations all while maintaining operational status and availability. This required frequent software and network reconfiguration and countless troubleshooting calls to accomplish. We were able to facilitate the uninterrupted operation of the unit throughout the entire renovation. Later in my career, I was responsible for inventory management and ordering, as well as generating employee schedules. I worked as the pharmacy's controlled substances custodian which required verifying every inventory transaction for controlled substances to ensure every unit is accounted for without discrepancy. I also maintained, repaired, and configured the automated robotic arm used to refill prescriptions.

- **Accomplishments**

- Responsible for operating, maintaining, troubleshooting and repairing all hardware/software, networks and robotic systems within the high-volume pharmacy environment.
- Air Force Achievement Medal for Meritorious Service
- Run cost analysis for medication ordering leading to an annual savings of over \$250,000.
- Increased prescription refills from an average of 600 per day to an average of 1000 per day by reconfiguring and optimizing automation equipment.

## Certifications/Languages

- HTML5, CSS, JavaScript, React, SaaS, JAVA
- GitHub, Adobe XD, Illustrator, LucidCharts
- CompTIA A+
- CompTIA Project+
- CIW Site Development Associate
- CIW Advanced HTML5, and CSS3 Specialist
- CIW User Interface Designer
- Air Force Advanced Leadership School (ALS)
